DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Traino.

Traino teaches a sheet material handling system comprising:

at least one support member having a substantially vertical support leg, 16, extending from a substantially horizontal base, 13, see figure 2;

a planar working surface, 11, connected to each support leg by a hinged connection which allows pivoting of the planar working surface with respect to each vertical support leg along a pivot axis, see figure 3;

a latching member operatively associated with the base configured to lock the pivoting of the planar working surface in a select position, the latching member comprising:

a bar, 24, having first and second ends pivotally attached at the first end to a base, see figure 2 and 3, the second end being configured to align with a bracket, 25, on the underside of the planar work surface near its lengthwise edge, and

means for releasably attaching the second end of the bar to the bracket, see figure 2 and

3.

Response to Arguments

Applicant's arguments with respect to claim 7 have been considered but are moot in view of the new ground(s) of rejection.
